

MASTER'S DEGREE PLUS (LM+)

UNIVERSITÀ
DI PAVIA

LM plus Project

The University of Pavia is increasingly presenting itself as **a bridge between students and the business world**, offering a path to high-level knowledge integration.

Solid academic formation, **in addition to knowledge of cultures and technologies** gained through qualified work experiences.

The *plus* for the actors involved

Students: integrate the knowledge acquired in the study path with a professional, structured and quality experience.

University: intensify collaboration with companies to develop joint projects in training and research.

Companies: Offer experiential learning opportunities by contributing to the consolidation of students' skills, knowledge, and potential, also with a view to collaboration «beyond the Project»...

Similar programs in Italy or abroad?

- In Italy **NO**
- At the international level, **YES**, in **Canada, Australia** and the **United States**

Co-op program is not about getting a job, but rather it is an approach to intellectual and professional growth and career success that demands continual learning and integration.

The project LM plus

The student attends five semesters instead of four. **Two of the last three** semesters include an in-company training period.

The student receives a **monthly expense reimbursement** of between 500€ and 800€. Training **experiences abroad** are possible.
